EDUCATION

B.E.(HONS) COMPUTER SCIENCE

Birla Institute of Technology and Science (BITS), Pilani, Hyderabad, India

Cum. GPA: 9.92/10

Stand first in my class which has around 700 students.

SENIOR SECONDARY EDUCATION

Sri Kumaran Children's Home - CBSE
95.2% | Grad. May 2014 | Bangalore, India

Best Scientific Temper Award

PRIMARY & SECONDARY EDUCATION

Sri Kumaran Public School - ICSE
94.48% | Grad. May 2012 | Bangalore, India

Best in Academics Award

AWARDS

Merit Scholarship from BITS
2015-Present | Top 1% get it

DAAD WISE Scholar 2017
2017 | One of approx. 150

TCS IT Wiz 2013 Bangalore Runner-Up
2013 | 2nd/approx 700 teams

IAYP Bronze Level
2012

EXTRACURRICULAR

ON-CAMPUS PROGRAMS COORDINATOR, 2016-17

National Service Scheme(NSS) - BITS
Hyderabad Chapter

As a member of the nucleus team which led the NGO, I organized and participated in various social welfare activities.

SENIOR MEMBER, 2014-PRESENT

The Quiz Club, BITS Hyderabad
I conducted, participated in and won numerous quizzes as an active member of the club.

RESEARCH & DEVELOPMENT EXPERIENCE

SMART DATA ANALYTICS RESEARCH, UNIVERSITY OF BONN

RESEARCH INTERN | DAAD WISE SCHOLAR

May 2017 - Present | Bonn, Germany

- Alongside Diego Esteves and Prof. Jens Lehmann, I am building a system which can estimate how trustworthy a website is based on its content, structure and visual elements. Various deep learning methods are being explored to this end.
- I am also working with Diego Esteves and Prof. Jens Lehmann on the new version of DeFacto, a fact validation framework. This involves building the various components of the framework such as evidence collectors, source evaluators, triple scorers and web crawlers from scratch.
- Under the guidance of Prof. Jens Lehmann and Nilesch Chakraborty, I developed a real-time fake news detector which employs deep learning and virtual adversarial training.

INDIRA GANDHI CENTRE FOR ATOMIC RESEARCH

RESEARCH INTERN

May 2016 - July 2016 | Kalpakkam, India

- I built an agent-based semantic web crawler called Creeper which is capable of retrieving pertinent OWL files from the web. It was also capable of retrieving relevant RDF and XML files and converting them to the OWL format. A pipe-lined architecture was used which significantly boosted performance.

BIRLA INSTITUTE OF TECHNOLOGY AND SCIENCE

UNDERGRADUATE STUDENT

Aug 2014 - Present | Hyderabad, India

- Under the guidance of Prof. Vijayabhaskar Marisetty, I developed a system which can give stock trading insights using machine learning to its user so as to maximize his gains.
- I worked with Prof. N.L. Bhanu Murthy and Dr. Aruna Malapati on an LSTM-CRF based system which can recognize named entities in texts written in Telugu, an Indian language.
- Alongside Prof. Anand M. Narasimhamurthy, I built an image recognition system using convolutional neural networks and transfer learning.
- I was a part of the team which built the website to manage project allotment, room booking and feedback collection at the institute.
